## **Nads Brazilian & Bikini Kit**

For something a little more adventurous, remove hair 'down there' with Nad's Brazilian & Bikini Kit. Go completely sexy smooth, or be creative with one of the four design templates including: 'Landing Strip', 'Bermuda Triangle', 'Heart Breaker' or 'Thunder Struck'!

The wax is ideal for areas with thicker, coarser hair like the bikini area or underarms.

Nad's Brazilian & Bikini hard wax has a sensual mango and peach scent, gives clean, smooth results for weeks and contains sweet almond and calendula oil, both known for their soothing properties.

**Nad's Brazilian & Bikini Kit 140g- RRP\$12.95**

### **How to use:**

1. Remove lid and heat in microwave. Let to stand for one minute to ensure heat diffuses throughout. Trim hair to 5mm.
2. Apply in a thick layer in the same direction of hair growth. Leave a small amount of wax at the end of the patch curling up.
3. Let the wax cool on your skin for about 15-30 seconds until it is soft and pliable and is no longer sticky to touch.
4. Quickly remove holding skin taut. Use the Soothing and Finishing wipes to remove any excess wax. Do not use water.

## GENERAL TIPS

- Always apply the wax in the direction of hair growth, and remove against it.
- Clean your bikini area using non-moisturising soap and then wipe your skin completely dry.
- When removing wax, do not drag but pull QUICKLY in the opposite direction of hair growth and as close to your skin as possible – not out in the air.
- When using a template, smooth the wax around the template bit by bit and avoid putting wax on the template.
- Once you have created the desired shape you may remove the template and touch-up the stray hairs.
- If you are going to try the more advance shapes such as Thunderstruck, ask a friend or a partner to help out!
- For easier removal of wax, with the paddle pop stick, make a curl at the end of the wax.
- To help remove dead flaky skin and ingrown hairs ensure you exfoliate the skin at least 8 hours prior to hair removal.
- Soothe the skin and help reduce any redness to the bikini area with Nad's Depileze Soothing Body Balm or Aloe Vera after waxing.
